Record of Special Town Meeting, Jan. 22, 1898

A meeting of the Inhabitants of the Town of Methuen qualified to vote in elections and in Town affairs, was held in the Town Hall in said Town, on Saturday, January twenty second A.D. 1898, at one o'clock and thirty minutes p.m. pursuant to Warrant No. 14 and File 12.

The meeting was called to order at thirty minutes past one o'clock, by Joseph S. Howe, Town Clerk who read the warrant for the meeting.

Art. 1 **Moderator**

A ballot was taken and Granville E. Foss was chosen Moderator by a unanimous votes and was sworn.

Art. 2 **Bonds**

Voted – by a unanimous vote, that for the purpose of extending and completing the Methuen system of waterworks as provided in Chapter 255 of the Acts of the Legislature of 1897, the Water Commissioners be authorized and instructed to issue the bonds of the Town for the aggregate principal sum of twenty five thousand dollars, in sums of one thousand dollars each, payable to bearer thirty years after date, with interest at four per cent per annum payable semi-annually, on presentation of coupons thereto attached.

The date of the said bonds to be fixed by the Water Commissioners, and the bonds to bear on their face the words, "Methuen Water Loan", and to be signed by the Town Treasurer, and countersigned by the Water Commissioners, and to be under the seal of the Town.

The principal and interest of said bonds to be payable in lawful money of the United States at such bank or at the office of such Trust Company in Boston as the Water Commissioners shall select. And a sinking fund is hereby established, and the Town shall annually contribute to such fund a sum sufficient, with the accumulations thereof, to pay the principal of the loan at maturity. No further business appearing, the meeting adjourned sine die.

Reports of Committees

Voted – To accept the Report of the School Committee.

Sewers

The Committee on Sewerage appointed at the last Annual Town Meeting presented the following.

Report

The vote under which this Committee was appointed seemed to have for its principal object to ascertain whether it is feasible to dispose of the sewage from those portions of the Town not already provided for, without carrying it through the City of Lawrence; and if this should be found to be impracticable, to ascertain and report on the most effective and economical method of its disposition. The Committee was authorized to employ an expert, and it secured the services of Mr. George A. Kimball, an engineer of high reputation, a member of the Metropolitan

Sewer Commission, and thoroughly familiar with sewage problems, Commission, and thoroughly familiar with sewage problems, Commission, and thoroughly familiar with sewage problems such as are presented in Methuen. Mr. Kimball examined the subject, stated his conclusions to the Committee and has made a written report, which is herewith submitted. The only engineering question which presents any difficulty is that of disposing of the sewage of the thickly settled parts of the Town lying north and west of the Spicket River. It is settled that the sewage of this section of the Town must be collected at the lowest point, and then must be disposed of either by pumping or by gravity. The topography of the Town is such that we cannot dispose of the sewage by gravity except by draining through Lawrence; and Lawrence must be paid for the use of its sewers. Mr. Kimball thinks this will prove to be for the best and most economical way. The committee did not consider it a part of their duty to make an estimate of cost, or any surveys except such as were necessary to settle the questions under consideration. Surveys were made sufficient to show that there is fall enough to admit of draining the sewage of Methuen Village into the Lawrence system near the Arlington Mill. The sewerage of the southeast part of the Town apparently presents no engineering difficulties. It seems to your Committee that the findings of Mr. Kimball are conclusive as regards the manner of disposing of the Town sewage. It is apparent therefore that the first step to be taken when the Town is ready to meet the sewage question is to make an arrangement with the City of Lawrence, permitting us to enter their sewer system. That being settled a preliminary survey of the thickly settled parts of the Town will next be necessary, to determine the general plan, size of pipe & as recommended by Mr. Kimball. The next step would be to construct a main sewer from the outlet, to that point in the village which a survey showed to be the most advantageous. The committee have no further recommendation to make, except to express their cordial approval of the report of Mr. Kimball.

Methuen, March 7, 1898

Engineers Report
5, 1898

Boston March

To the Committee on Sewerage, Methuen, Mass.

Gentlemen: - At your request I have made a preliminary examination of a portion of the Town of Methuen, with a view to making suggestions to you in regard to a proper system of sewerage. I am informed that your Committee is acting under

the following vote, which was passed in the Town Meeting of March 6, 1897.
"Voted to appoint a Committee of five to investigate and report upon the feasibility of a main sewer in the southeast section of the Town, connecting with the Merrimack River, with the ultimate intent of connecting the same to form a complete system of sewerage for the Town, with power to employ such expert help as they may need and appropriate \$300 for the same."

I judge from the reading of the above vote and from the examination of the Town, that it was the intention to investigate the feasibility of building a main sewer in the southeast section of the Town, discharging into the Merrimack River, and connecting with this main sewer the other portions of the Town with the view of forming a complete system for the Town.

The territory in the southeast part of the Town, which is now growing and in the near future will need sewerage, lies in the valley of Low Brook. This brook runs southeasterly in Methuen and thence through a portion of the City of Lawrence into the Merrimack River. It would be practicable to lay a main sewer down the valley of this brook and discharge it into the Merrimack River but it would not be wholly within the limits of the Town of Methuen. If such a sewer is built, it must be carried for a long distance through the City of Lawrence.

It is impracticable to drain that portion of the Town of Methuen within the valley of Low Brook into the Merrimack River by a main sewer laid entirely within the limits of the Town as the topography is such that it will be necessary to construct the sewer through a hill or ridge for a long distance, or to pump sewage over the ridge into the Merrimack River.

The other parts of the Town, which are thickly populated and will need sewerage in the near future, are in valleys which are separated from each other by ridges running north and south and it is exceedingly difficult to build sewers to connect these several valleys with a sewer in the southeast part of the Town discharging into the Merrimack River. To carry out this plan, which I understand, is suggested by the vote of the Town, it will be necessary to place in each of the valleys a sewage pumping plant for forcing the sewage over the ridges to the river. The first cost of these several pumping stations, with the necessary force mains and other appurtenances, together with the yearly cost of maintenance would be such as to make the project impracticable. I have considered in a preliminary way the best system of sewerage for your Town. I find that portions of the southerly part of the Town lying adjacent to the city of Lawrence are already provided with sewers discharging into the Lawrence sewer system, under an arrangement made with the City of Lawrence.

That portion of the Town which is not sewered but which is now becoming thickly populated and which will probably need sewerage in the near future, is divided by the topography into three sewer districts, namely: - the village, which naturally drains into Spicket River; the territory lying on each side of Jackson

Street, which naturally drains into Bloody Brook; and that portion in the southeast part of the Town which drains into Low Brook. Three methods of disposing of sewage are now in use in the towns and cities of this Commonwealth. It has been the custom of each city and Town to adopt the method which best suits the peculiar conditions existing in each place. The methods are as follows: - 1st Filtration through the soil, the effluent being discharged into the stream.

2nd Chemical precipitation, which means that a portion of the solid matter is removed from the sewage by the use of chemicals and the effluent, is then discharged into some stream. 3rd Discharging the sewage into some large body of water where it will be thoroughly diluted and carried off to sea. To properly dispose of the sewage of Methuen by land filtration would require at least ten acres of land for a population of 4000 and also sufficient additional land to provide for future growth. This land should be remote from thickly inhabited districts, and should be composed of loose, gravelly soil, suitable for the proper purification of the sewage.

From inquiries, which I have made, it would seem that it is doubtful if such land could be obtained. If the land can be found, it will then be necessary to collect the sewage of the Town in each of the several valleys above mentioned, and erect pumping stations in each district from which the sewage may be forced to the filtration area. To clarify sewage by means of chemicals and to discharge the effluent into some suitable stream, would require pumping stations in two of the valleys at least, and perhaps in the third. In addition to the cost of running these pumping stations, it would be necessary to expend from 30 to 40 cents per inhabitant per year for chemicals and labor. On Account of the expense in first cost and also the annual cost of maintenance, neither of the above systems can be recommended.

I have considered the best method of providing sewerage for the portions of the Town above mentioned, and conclude that it is best to discharge the sewage into the sewers of the City of Lawrence. I find that it is practicable to discharge the sewage from the village and adjacent territory into the Lawrence sewer at the junction of Stafford and Ingalls Streets. Mr. Joseph S. Howe of your committee has taken levels from the village to the sewer in Stafford Street, from which we find that a suitable grade can be obtained.

That portion of the Town lying in the valley of Bloody Brook can be sewered best by discharging sewage into the 15 inch pipe laid in Jackson Street in Lawrence near the Methuen line. The valley of Low Brook can best be provided for by joining with the city of Lawrence and building a main sewer down the valley of Low Brook and discharging it into the Merrimack River. If it is not practicable to join with Lawrence in this undertaking, it is probable that legislative authority can be obtained to enable the Town of Methuen to build this sewer in the city of Lawrence. The sewers herein mentioned should be built under what is called the separate system. Only house sewage should be provided

for, and all storm water should be excluded. I would also call your attention to the importance of having surveys made in each district before construction is commenced. From these surveys a proper and complete system of sewers can be laid out upon the map and it can be constructed from time to time as the necessities of the case may require.

Voted – To accept report of Committee on Sewers.

The Committee that was appointed to investigate and report on Article 43 asking for a hose truck and building for the same in the Arlington District respectfully submit the following.

Report

We do not think at the present time that it is policy to put any hose or build a Fire Station in that

District. With the horses in any reasonable distance the run for the Fire Dept. to any of the boxes in

that District is the best and quickest run that they have, and can be made in quick time. As for instance, when Box 54 was pulled for a fire just over the line in Lawrence, our Dept. was on the scene quick enough to furnish ladders before the Lawrence truck got there. We do recommend though, that a Central Fire Station be built as near the center of the village as possible that will hold all of the apparatus and sleeping room for the drivers and men. And as there are a number of single men in the Dept. we think that some arrangement could be made with them to sleep there; thereby putting the Dept. on a footing equal to any of its size. And they could respond to an Alarm in the night very promptly without any expense to the Town other than their regular pay when on duty. If this plan is adopted we would recommend that one pair of horses be in the house, so that during the day they could make as quick response as in the night.

Report on Electric Light Plant

To the citizens of the Town of Methuen,
Your Committee chosen according to a vote at the last special Town Meeting for
the purpose of investigating the feasibility of the Town's establishing and
maintaining an Electric Light Plant for street lighting purposes, begs to make the
following report.

Report

After having carefully examined the map of the Town and secured measurements
of the proposed routes, which measurements were verified by the Superintendent
of Water Works – Mr. Welsh and also by Mr. Osgood who has had large
experience in electrical matters, your Committee issued the following letter asking
for estimate on the proposed Plant.

Gentlemen: -

At a special Town Meeting a Committee was appointed to
investigate the feasibility of the Town's establishing and maintaining an Electric
Light Plant for street lighting purpose.

The Committee estimated that a Plant of 100 – 1200 candlepower arc
lamp capacity, (80 of these lamps to be furnished and hung for immediate use,
and the other 20 lamps to be provided for in the future) would meet our
immediate needs.

After carefully measuring the proposed route we find that 17 ½ miles of
wire will be required, and the furnishing and setting of about 425 poles, using our
Fire Alarm and Street Railway Poles for the balance of the line. On this basis we
should be pleased to receive your estimate (in detail as far as possible) of the cost
of such a Plant, submitted under the following heads.

Estimated cost of Steam Plant	\$
Estimated cost of Dynamos & Lamps	\$
Estimated cost of Poles, setting, painting, etc.	\$
Estimated cost of giving size of pole at butt	\$
Estimated cost of Cross arms, Insulators, wire etc.	\$
Estimated cost of including Lamp Suspensions (no amounts were recorded)	\$

The whole aggregating a complete Electric Light Plant ready for street lighting.
We should also be pleased to have you submit an estimate of the cost of
maintaining such a Plant, exclusive of Interest and Depreciation, on a basis of the
lamps being lighted 282 nights per year until midnight.

The cost of coal being \$4.00 per ton, delivered

The cost of wood being \$3.00 per cord.

Water free.

Replies were received from the following responsible concerns; Western Electric Company, Ball Electric Light Company, Westinghouse, Church, Kerr Co., General Electric Co. whose estimate varied from \$10, 105.⁰⁰ to \$16,202.⁰⁰ this latter estimate being on a Plant of 120 light capacity, while the others were for a 100 light Plant according to our letter.

Representatives from the different Companies stated before the Committee, and also a number of Citizens who were invited to the hearing, that in their opinion these figures were large and would be materially reduced if it came to a question of bidding for the construction of the Plant.

All these Estimates were based on a first class Plant all set up ready for operation in a building furnished by the Town; everything to be first class and the best of its kind.

Your Committee is satisfied, after consulting with and receiving estimates from builders that a brick building of suitable dimensions for receiving such a Plant, can be erected for a sum not exceeding \$2,000.⁰⁰ From the estimate given therefore, your Committee concludes that a first class Electric Light Plant, of 100-1200 C.P. arc Lights capacity, can be installed for \$16,000.⁰⁰ ready for operation; this estimate covering cost of building and is based on the figures submitted by four of the most responsible companies in the United States. The cost of maintaining same allowing for interest and depreciation on the Plant, cost of labor, fuel and repairs, in the judgment of your Committee would not exceed \$4,500.⁰⁰ per annum for 80 lights, or \$5,200 for 100 lights burning 282 nights in the year from dusk until midnight; and on special occasions such as Fourth of July eve and other times if deemed

advisable for the Town's safety, the lamps to burn all night. This cost of maintenance is based on actual costs to other Plants of equal size, particularly those at South Norwalk, Conn., Danvers and Stoughton, Mass.

With the installation of this Plant we should be receiving 120,000 C.P. light for \$5,200.00 under our own control, against 43,000 C.P. we are now supposed to receive for which we pay \$3,600 per annum. This latter sum will be increased \$200.00 this year if the petitions in the Warrant for additional lights are granted, making our expenses for this year \$3,800.00

With our own Plant it is readily seen that we shall obtain nearly three times the light we are now receiving with very little additional expense and lighting 13 $\frac{1}{2}$ miles of streets where we are now lighting about 7 miles.

Reports of Committee – Sewerage

The Selectmen who were directed at the last Annual Town Meeting to confer with the Lawrence City Government and ascertain the terms on which the sewerage of Methuen would be permitted to enter the Lawrence sewers, submitted the following Report.

**Methuen, March 10,
1899**

In accordance with a vote passed at the adjourned Town Meeting held on Saturday, March 19, 1898 authorizing the Selectmen to see the authorities of the City of Lawrence and ascertain on what terms the Town of Methuen can discharge their sewerage into the Lawrence sewer at or near Stafford Street, in accordance with the plan recommended by the report of the special committee on sewers, would respectfully submit the following report as received from the authorities of the City of Lawrence.

**City of Lawrence
In Board of Aldermen
February 20, 1899**

Ordered, That the Mayor be and hereby is authorized and directed to enter into an agreement with the Town of Methuen, allowing said Town to discharge its sewerage into the sewerage system of the City of Lawrence, under the conditions set forth in the report of the City Engineer relative to this matter.

**Report of City Engineer
Sewerage of the Village of Methuen
Recommendations**

That the discharge from a “separate system” of sewers only can be taken. That the Town of Methuen be allowed to connect with the sewers belonging to the City of Lawrence from portions of the Town of Methuen north of the area that is naturally tributary to the Spicket main sewer belonging to the City of Lawrence on the annual payment of a sum not less than \$185. That this amount be increased at a rate of \$9.25 per year for each fifty persons that may connect with the sewer over an above 1,000 persons, which the annual payment of \$185.00 will cover, when the discharge does not exceed 100 gallons per head. That these amounts be increased proportionally for all amounts of sewage discharged through the sewer over and above 100 gallons per capita per day, these amounts to be determined, by representatives of the Town and city working together, by weir measurement in some manhole along the line of the Methuen section of the sewer near to its connection with the sewer of the City of Lawrence. The Town of Methuen to set the weir and provide the necessary facilities for measuring the flow. That the Town of Methuen pay half the cost of making a new 24 inch connection between the Broadway sewer and a branch of the Spicket main sewer opposite the Arlington Mills just north of the Spicket River.

That the Town of Methuen furnish the City of Lawrence annually a certified statement of the number of persons connected with the sewerage system of Methuen draining under this agreement into the sewers of the City of Lawrence. That the connection may be made with the sewers running down Broadway or down Hampshire Street as the Town may deem best. If down Hampshire Street the Town will not be required to pay any part of a 24-inch connection mentioned above.

That agreements made on this basis stand for five years at the end of which time new agreements may be considered on request of either party.

Rate: - \$185.00 annually as a minimum assessment, which will pay for 1,000 persons, discharging at a rate of 100 gallons per day – 100,000 gallons per day. \$9.25 additional for each 50 persons connected with the sewer over 1,000 persons. If the amount of flow exceeds 100 gallons per head per day then the rate shall be \$5.00 per 1,000,000 gallons determined by weir measurement.

New Fire Station - Report of Committee

The committee appointed at a special Town Meeting, January 1899, to carry into effect a motion, "That a committee of five be appointed to consider the matter of a new fire department station and selection of a site therefore, with cost therefore," respectfully submit the following report.

After an examination of several lots your committee would submit the plans of two lots, which are available, with the price at which they can purchases. Lot No. 1 is situated at the junction of Lowell and Osgood Streets near Railroad Bridge containing 19.656 feet of land at 15 cents per foot, costing \$2948.40. Lot No. 2, a plan of which is here submitted, consists of lots 1, 2 and 3 with privilege of lot no. 4 if considered necessary, on plan of land of Joseph Morse Estate on Broadway adjoining St. Monica Church. Lots 1, 2 and 3 containing 12.035 feet at asking price of 15 1/3 cents will cost \$1855.22

with Lot 4 added if necessary containing 3804 feet at 10 cents per foot, costing 380.40 the total area would then be 15839 feet, the cost at 14 cents per foot being \$2235.62. We herewith present plans of a building, which your committee have decided adequate for the purpose intended. This plan calls for the structure of a brick building 49-6' by 67-6', 32 feet high, sidewalls first story 16 inches thick, second story 12 inches thick. Front wall, first story, 20 inches thick, second story 16 inches thick. Hose tower 11 feet square, 53 feet high to belfry, which is 12 feet. Walls first and second stories 20 in. thick, above 16 inches thick. The first floor provides for three runs, viz.: - steamer, hose wagon and hook and ladder truck, stalls for eight horses and box stall.

Second floor provides for dormitory or sleeping room for six men, Engineer's room 12-6' x 12-0', recreation room 19x28-6' bathroom 11x17-6', workshop, hayloft and room for batteries.

The total cost of a building in accordance with this plan ready for occupancy, would be \$12,000.00 at present price of labor and materials, and when we say 12,000.00 we mean it, provided it is built in a business-like manner with no political or favorite perquisites to come out of it. The total cost of land and building on lot No. 1 would be \$14,948.40; the cost on lot No. 2 would be \$14,235.62.

This ends the report proper and is all your committee were asked to do; but the opportunity that your committee have had of inspecting the housing of the fire department and its conveniences leads them to state, for the benefit of those who have not had the opportunity, that there is need of better accommodations.

The engine house on Lowell Street is totally inadequate for the purpose for which it is used, having outlived its usefulness. The storage of fire apparatus under the Town House is inconvenient and cramped and the place is not adapted for the use to which it is put. In the judgment of your committee the lot at the junction of Lowell and Osgood Streets is to be preferred for the following reasons. First: - that by its elevated location the property to be covered in case of fire can be reached at an even or down grade. Second: - that the prospective growth of the Town will be on the west side of Broadway rather than on the east side. Third: - that the lot being accessible from two streets, makes it convenient for the use of the Town for other purposes for which the Town will have to use it. Fourth: - that it is practicable as a center of the property to be protected. Fifth: - its location removes any annoyance to abutters.

Should this site be chosen your committee would suggest the establishment of a hose company in the Arlington District, with a suitable

apparatus and building, for primary use in case of fire in that section, which can be done at a cost of \$1500.00 including land.

Respectfully submitted,

Article 3

Contract with Lawrence

A majority of the Committee appointed to investigate the North American Sewage Disposal Company reported by William M. Rogers, Chairman, as follows: -

A majority of the Committee appointed at a Special Town Meeting July 22 1899, to investigate the sewage disposal system that the North American Sewage Disposal Company offers to establish and maintain for Methuen, respectfully submit the following report: -

This company has an experimental station at Revere, Massachusetts, located on the edge of the salt marsh, and takes sewage for experimenting from the Town sewer. This station is a miniature filtration plant. All the works are in a small building, and correspond in every particular with the Company's proposed system. It has been in operation about six months. The Company has never installed a plant in any Town or city.

The system calls for an indoor plant in all its different parts, and in all its processes. This necessitates a large building for Methuen; according to the Company's estimate, one covering an acre of land. The Company's Engineer decides that the works should be located near the head of Morrison's Court, between the Cemetery and the Spicket River, the stream into which the clarified sewage water would be discharged. The report of the Company submitted to your Committee shows that the works will cost nineteen thousand four hundred and fifty dollars, and the collecting sewers forty seven thousand seven hundred eighty six dollars and eighty seven cents, in all sixty seven thousand two hundred thirty six dollars and eighty seven cents. To enter the Lawrence Mains costs sixty one thousand twenty six dollars and three cents, a saving to the Town of a present outlay of six thousand and one hundred and sixty dollars and sixty-four cents. The annual expenses of running the plant as fixed by the Company are as follows: -

For an engineer -

900.

Labor 1/2 time	300.
Power, Steam or electric	<u>1300.</u>
Total	\$2500.

The outlay, for an acre of land in the hart of the village has not been considered. The only comment made by the Company on this item of expense is that incident to entering the Lawrence sewer there will be land damages for carrying, collecting sewers a mile through private lands and that this expense will be nearly as much as the cost of the land. The answer to this is that there will be no land damages whatever.

As to an acre of land, it would be practically impossible to obtain it for the disposal of sewage. To more than offset twenty five hundred dollars, the running expenses of the plant, the annual sum to be realized from the remains of the sludge bed is named. When mixed with loam it is claimed that it is worth 15 dollars a ton. The annual yield from this plant is estimated at 500 tons, thus giving a return of \$7500.00 In our judgment it would be difficult to give it away. This is the decided opinion of the best authorities. The cost of the land, if within our reach would make the present outlay large. The grades of our territory have been determined and we know very nearly the cost of the collecting sewers and mains needed. If compelled to abandon a disposal system by having a stream like the Merrimack River closed against us (a thing not likely to happen) or for any other reason we should still have our sewerage system and it would be adopted to serve any other disposal system we might adopt. To enable the voters to make an intelligent comparison we ought to inform them that the opportunity offered the Town to enter the Lawrence Sewers at an annual rental of \$185 for every thousand people within the district to be drained. At this rate the annual expense for three thousand people would be \$555.00 for five thousand people \$925.00.

A majority of the Committee cannot recommend the Town to adopt the plant.

Committee

William M. Rogers
J. O. Parker
Alfred Newsholme }

Alfred Sagar

Mr. Clarence D. Holman then read the following Minority Report.

Of the Committee appointed to investigate the system of sewage disposal known as the North American Sewage Disposal Co. System, the minority beg leave to make the following report.

That owing to the limited time given the above Company, the Company have been unable to make reports or estimates satisfactory to themselves or the Committee, and they as that in justice to themselves and their system that they be granted more time.

1st That their engineer may survey the Town with a view to making a plan that shall be adapted to their system, hoping and expecting thereby to so arrange it that they may be able to deliver the sewage to their tanks by gravity and air pressure; this they do free of all expense to the Town.

2d That their architect may have time to make plans & specifications and detail drawings of Building, Tanks, filter beds and for power and heat if needed.

3d That their chemist may have time to complete an analysis (now in process) of their sludge as prepared for the market, also for the water as it leaves the filter beds.

4th To give their representative opportunity to confer with the Directors of the Co. many of whom are away on vacation, in regard to the Company putting in a plant at their own expense on one or two years trial. And the Committee recommended that their request be granted and the time extended.

Voted: - to accept the report of the Committee.

Article 3

Contract with Lawrence

A motion was made that Article 3 of the Warrant be adopted. Mr. Holman moved an amendment, that the further consideration of Articles 3, 4, 5 and 6 of the warrant be postponed to the Annual Town Meeting in March. A long discussion ensued during which Messrs Farnham and Barry, representing the North American Sewage Disposal Company, were allowed to address the meeting.

At the close of the discussion, a vote was taken on the amendment proposed by Mr. Holman, with the following result: Yes 13 – No 18. And the amendment was declared lost. It was then voted – that the Town enter into an agreement with the City of Lawrence

allowing the Town to discharge its sewage into the sewage system of said City of Lawrence under the conditions set forth in the report of the City Engineer of Lawrence relative to this matter, and authorize the Selectmen to sign such agreement in behalf of the Town.

Article 4

Sewer Construction

Voted to pass over Article 4 of the Warrant.

Article 5

Raising Money

Voted to pass over Article 5 of the Warrant.

Article 6

Legislative Committee

Voted- to empower a committee to petition the next Legislature for such enactment as may be necessary with regard to the sewage system.

Voted – that this Committee consist of three and be appointed by the Moderator. Jos. S. Howe, Daniel W. Tenney and Alfred Newsholme were appointed as that Committee.

Voted – that the North American Sewage Disposal Company be allowed to present their plans and specifications to the next Annual Town Meeting without expense to the Town.

At 4 o'clock and 40 minutes the meeting adjourned sine die.

Amos G. Jones, Constable of

A true copy of warrant and return, Attest

Jos. S. Howe – Town Clerk

**Record of Special Town Meeting – June 16, 1900 – Warrant No.
24 File 12**

A meeting of the Inhabitants of the Town of Methuen qualified to vote in elections and in Town affairs was held in the Town Hall in said Town on Saturday, June 16th A.D. 1900 at two o'clock p.m. pursuant to Warrant no. 24 file 12.

The meeting was called to order at two o'clock p.m. by Joseph S. Howe, Town Clerk, who read the warrant under which the meeting was called.

Article 1

Moderator

A ballot was taken and Joseph E. Buswell was chosen Moderator by a unanimous vote and was sworn.

Article 2

Issue of Water Loan Bonds

Voted, by a unanimous vote, that for the purpose of extending and completing the Methuen system of waterworks, as provided in Chapter 227 of the Acts of the Legislature of 1900, the Water Commissioners be authorized and instructed to issue the bonds of the Town for the aggregate principal sum of twenty five thousand dollars, in sums of one thousand dollars each, payable to bearer thirty years after date, with interest at four per cent per annum payable semi-annually, on presentation of coupons thereto attached. The date of the said bonds to be fixed by the Water Commissioners, and the bonds to bear on their face the words "Methuen Water Loan", and to be signed by the Town Treasurer, and countersigned by the Water Commissioner and to be under the seal of the Town. The principal and interest of said bonds to be payable in lawful money of the United States, at such bank, or at the office of such Trust Company in Boston, as the Water Commissioners shall select. And a sinking fund is hereby established, and the Town shall annually contribute to such fund a sum sufficient, with the accumulations thereof, to pay the principal of the Loan at maturity.

Article 3

Fire Alarm Box

Voted – to locate a Fire Alarm Box at the corner of Hampshire Street and Broadway, and appropriate one hundred and fifty dollars for that purpose.

Article 4

Railroad Bridge

Joseph E. Buswell made a verbal report for the Committee to whom was referred the subject of covering the Railroad near the New Engine House. The report of the Committee was accepted, and it was

Voted: - In consideration of the Boston & Main Railroad a body corporate bridging over a certain vacant space over the tracks of said Boston & Maine Railroad situated in Methuen, County of Essex, Commonwealth of Massachusetts, at the junction of Osgood and Lowell Streets, so called, said space lying between two bridges now owned by said Boston & Maine Railroad, and contiguous thereto. The inhabitants of the Town of Methuen in Town Meeting assembled do hereby agree to accept the bridge over said space, when completed, as a public highway, and to keep in repair and maintain the same forever, and to hold the Boston & Main Railroad harmless from any damages that may be caused by any defect in said bridge. This agreement does not include bridges now already built and maintained by said Boston & Maine Railroad, and connected with said vacant space to be covered, and has no relation thereto.

And we the Inhabitants of the Town of Methuen in Town Meeting properly called do hereby instruct the Selectmen of the Town of Methuen to execute any contract, instrument or other papers that may be necessary to the fulfillment of this agreement.

Article 5

Dewey St.

Voted, to accept Dewey Street as laid out by the Selectmen.

Article 6

Russ St.

Voted, to accept Russ Street as laid out by the Selectmen.

Article 7

Ashton Place

Voted, to accept Ashton Place, as a Town way, as laid out by the Selectmen.

Article 8

New Street

After considerable discussion it was voted to pass over Article 8, but it was

Voted, that the Street Commissioner be instructed to plough out the snow in winter, in the private way running from Pelham St. near the house of Julian E. McKay northward about four hundred and fifty feet.

Article 9

Street Lamps

Voted, to substitute three Welsback lights, suitably located for the electric arc light on Pleasant St. near the foot of Highland Street. Voted, that the location of these lights be referred to the Street Lighting Committee.

Article 10

Street Lights

Voted: - to erect and maintain four incandescent electric lights to be located on Milk, Dewey, Arthur, and Prospect Streets, and appropriate sixty five dollars therefore.

Voted: - that the location of these lights be referred to the Street Lighting Committee.

Article 11

King St.

Voted, to establish the grade on King Street, and appropriate one hundred and fifty dollars, to grade and gravel the same.
