

Lawn Mower Fire Safety Tips

- * Start mowing near the house and mow outward to create a firebreak.**
- * Never fuel up a hot mower.**
- * Replace any leaky gas caps.**
- * Once you have fueled up, keep the gasoline container at a safe distance.**
- * Disconnect the spark plug before doing any service on the mower. A spark plug can cause the mower to start unexpectedly.**
- * Clear rocks from the mowing area.**
- * Keep the mower clean of fuel.**
- * Routinely clean out grass from the mower blades with a hose. Never put your hands near the blade unless the spark plug has been disconnected and the unit has completely cooled.**
